tiny tub time

Easiest for you, best for baby: our testers splished and splashed to find out which tubs are tops BY ASTRID VAN DEN BROEK

new concept

OUR READERS SAY

"As a mom of four, I wish I had this years ago. I'd be less afraid of a drowning (there's more control over slippery bodies), my back would hurt less and my babies would be so comfy in this pseudo-fetal position."

LIZ MACDONALD AND 11-MONTH-OLD LAURA

FEATURES This recyclable über-bucket designed in Holland boasts a non-skid, curved bottom to keep baby safe and water warm, while an attachable platform (later an ideal toddler stepstool) clicks on to make bathing a little one more back-friendly. Bonus: this design is said to calm colicky cries.
