

bumpBUZZ

RRP: \$59.95 &
multifunctional stand for
\$119.95.

Both are available online
www.sunros.com.au or
from selected stockists
nationally.

The TummyTub

Not only is it the safest, easiest and most calming way to bath a baby, Australian parents will be pleased to learn the TummyTub uses only 5 litres of water or a third of that used in conventional baby baths.

The unique womb-shape design of the TummyTub helps newborn to two-year-old babies to relax in a familiar foetal position and retains the bath water at a comfortable level for 20 minutes. Parents only need to support their baby's head under the chin. The advantage being that they always have one free hand to wash and comfort your baby.

Made of sturdy plastic, the Tummy Tub is easily stored and transportable, has no moving parts, requires no fastening or snapping and can be cleaned with mild detergent.

The TummyTub Stand makes it much easier to wash baby while sitting comfortably. There's no need to stoop over the bath or sit on the floor.
